

IMPERIAL COLLEGE LONDON
DEPARTMENT OF
MATHEMATICS

ACADEMIC
REPRESENTATIVE

MANIFESTO

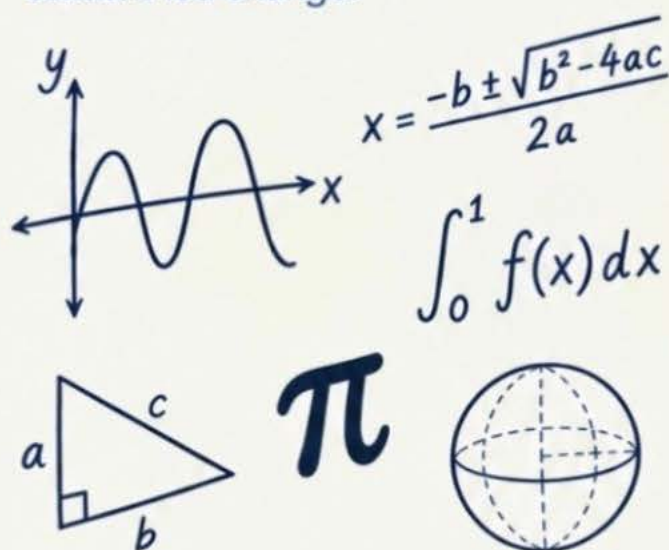

Ashwin Ashok Sangeetha

My Promise

I am standing to be your Academic Representative for the Mathematics Department, and my goal is to ensure that all student voices are heard, helping to create a happy and healthy environment for everyone.

I'm here to listen, represent, and work with staff and fellow students to create real, student-led change.

Better Academic Support

I will work to make sure everyone receives the academic support and mentorship they need to perform to the best of their ability- from collaboration in study groups, to resources, to communication with staff.

A Stronger Student Voice

I will represent your concerns at the departmental level, making sure student voices inform decisions- from curriculum to timetabling, to any other concerns you may have.

Support for Your Wellbeing

I will work with the Wellbeing Representatives to promote a healthier, less stressful experience because you should feel supported, not just academically challenged.

Build a Stronger Community

With your feedback, I'll help bring people together, organise more social and academic events, and create a department where we can learn, collaborate and enjoy the journey together.
