Manifesto

I propose the creation of a comprehensive alumni database, allowing former students to voluntarily share their occupation, contact details, and other relevant information; for current students, this applies a "nonsense-filter" to existing social media apps like LinkedIn, where searching for EEE alumni in your so desired industry can culminate in meaningless scrolling. For alumni, this database would provide a convenient way to stay connected with their graduating class in a single, centralized location, rather than relying on individual searches.

As a nice-to-have, a dedicated alumni website could enhance engagement by featuring updates on notable achievements, postgraduate research highlights, and industry insights. A blog section could facilitate knowledge-sharing, while a monthly newsletter and mailing list would help maintain an active and well-informed alumni network.
