My objectives...

- **Insights & Education** 📚 Sharing internship-driven insights, with a focus on financial statement analysis and DCF modelling to understand valuation at a fundamental level, **NOT** just memorised interview models.
- **Application Support** 🙌 **CV & Mock Interviews:** Having received final round interviews at the top BB and EB banks, I know what works and what doesn't. Technical knowledge is no use if you can't communicate your knowledge across clearly. I want to provide training on public speaking and mock interviews to help you feel confident!
- **Networking** 📧 Use my network to connect you with industry professionals and help facilitate networking events and panels.
- **Training:** I have completed valuation training with leading providers including Financial Edge, Wall Street Prep, and Training the Street, and plan to leverage this experience to deliver on-campus training while partnering with these firms to secure sessions and discounted course access for members.
- **Society collaboration:** Collaborate closely with the VC/PE Society to expand exposure to restructuring through their competitions and training, with the aim of establishing RX as a dedicated branch within QTC.
