"CONNECT. MENTOR. INSPIRE."

First-year Molecular Bioengineering student who believes the connections you make at university shape your entire career — if someone helps you make them. That's exactly what I want to do as Head of Internal & Alumni Relations.

- I A structured alumni mentorship programme matching current members to professionals in their field
- II Regular alumni spotlights and fireside chats — bringing real career stories into the room
- III Strengthened internal culture through member events, welcome initiatives, and a connected community
- IV A living alumni database that makes it easy to reach out, reconnect, and collaborate
