

Vote Jay for DoCSoc President

What I'll do

- IC Hack 750:** I will try to grow IC Hack to take it to the max, with more hackers and ambition than ever.
 - Hopefully, if we can get capacity up to 750 people at IC Hack, then there'll be enough tickets for everyone, and the coolest projects yet can take the stage, judged by our awesome sponsors!
 - I also really know that getting a ticket is super tricky and can be scary – I'd like to make it less like this. *“Woo! I got a ticket and so did my friends”*
- AI:** it feels like everything's changing – I'll make sure DoCSoc and its members are ready.
 - With even more relevant events and sponsors, we can be so ready for these exciting times!
 - But it won't be the only focus: there'll always be something for *every interest*, especially since AI isn't the only exciting thing happening in tech right now. 
- Socials/Events:** I'll work with the amazing events officers to keep DoCSoc events goated and make sure *everyone* has a good time!!! *Yay :D*
 - Especially events to bring together DoCSoc families and making sure everyone has a fun, well-fed time :) *Nom nom nom*
- Resources:** I'll bring the secret revision folder back under DoCSoc maintenance, organising and streamlining materials. *“I feel so ready for exams”* 
- Feedback:** I will collect and act on how you think things are going.

Why me

Experience: Having repped in DoC for 2 years, done things around the dept, organised big events, and worked on high-stakes projects, you can trust me to lead DoCSoc well. I've also previously interned at a DoCSoc sponsor, and a growing US AI startup while taking on extra roles dynamically. In doing these, I know what gears need turning at different times and how to go the extra mile.

Enthusiasm: I have big plans for what DoCSoc can do (see below)! And the energy to get them done!! I'm usually smiling (I hope!) and setbacks only push me to go further. *I always like to keep it real !!*

:D

Do chat with me if you see me around – would be awesome to hear your thoughts!
